ABOUT THE WPA

The WPA is a global membership-based, all-volunteer, professional organization formed to promote, develop, and professionalize the advancement of women in poker. This is done by heightening the exposure of current women poker players while encouraging and developing new women players. WPA actively advocates for women in poker.

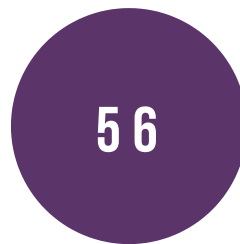

We bridge the gap between players, operators and the industry by initiating conversations and avenues to elevate the overall experience of poker. We seek opportunities to empower women thru conferences, workshops, training, networking and social events with a focus on community, education and skill development.
